

MASTER WEBSITE PROMPT — “BEFORE WE DIE”

Design and build a fully responsive, premium, highly aesthetic multi-user digital journal called:

BEFORE WE DIE

Core tagline

“A collection of things worth living for.”

Alternative small subtitle: **“We don't know how much time we have. So let's make a list.”**

The website is a private, invite-only digital life archive where a group of friends/family can collectively record things they want to experience, places they want to visit, things they want to create, people they want to become, and memories they want to make before they die.

This should NOT feel like a productivity app, task manager, Trello board, Notion clone, or conventional bucket-list website.

It should feel like:

cinematic journal + private digital scrapbook + bucket list + memory archive + time capsule.

The emotional feeling should be: **nostalgic, intimate, adventurous, mysterious, youthful, slightly melancholic, hopeful, cinematic and timeless.**

1. OVERALL VISUAL DIRECTION

Use an extremely sophisticated editorial aesthetic.

Color palette

Primary background:

- Almost-black charcoal: #0B0B0C
- Secondary background: #111113
- Card background: #171719
- Slight warm-gray surfaces: #1D1C1A

Text:

- Primary: warm ivory/off-white #F1EEE7

- Secondary: muted gray #9B9994
- Tertiary: #66645F

Accent:

- muted warm beige / antique gold
- use sparingly

Do NOT make it colorful.

Avoid:

- neon gradients
- excessive purple/blue AI aesthetics
- glassmorphism everywhere
- bright buttons
- generic SaaS dashboards
- excessive shadows
- excessive rounded cards

The website should look beautiful even when almost entirely monochrome.

2. TYPOGRAPHY

Use two complementary typefaces.

Display font

Elegant high-contrast serif such as:

- Cormorant Garamond
- Playfair Display
- DM Serif Display
- Instrument Serif

Use this for:

- major headings
- quotes
- emotional statements
- journal titles
- locations
- dream titles

Interface font

Clean modern sans-serif such as:

- Inter
- Manrope
- Geist
- DM Sans

Use this for:

- navigation
- buttons
- metadata
- dates
- labels
- statistics

Typography should create a strong contrast:

SERIF = emotion

SANS-SERIF = information

3. TEXTURE & ATMOSPHERE

The website should have a very subtle film-grain texture.

Add:

- extremely subtle noise overlay
- slight vignette around edges
- faint paper texture on journal pages
- subtle photographic imperfections
- tiny grain on images

Do NOT make the grain overwhelming.

The website should feel like an old photograph scanned into a futuristic archive.

Use lots of negative space.

4. LANDING PAGE

The landing page should be almost cinematic.

Full-screen dark background.

At the center:

BEFORE

WE DIE

Use a huge elegant serif font.

Under it:

A collection of things worth living for.

Below:

ENTER THE JOURNAL →

Very small text at bottom:

PRIVATE LIFE ARCHIVE · EST. 2026

At the very bottom, barely visible:

"We don't know how much time we have. So let's make a list."

5. LANDING PAGE ANIMATION

When the page loads:

1. Entire screen begins almost black.
2. Film grain slowly appears.
3. "BEFORE" fades in.
4. "WE DIE" appears slightly later.
5. Subtitle fades in.
6. Button appears.
7. Background slowly reveals a barely visible photograph.

Animation must be slow and cinematic.

No flashy transitions.

Use:

- fade
- blur-to-sharp
- subtle parallax
- slow image movement

Everything should feel intentional.

6. LOGIN / INVITATION

Create a minimal authentication screen.

Title:

WELCOME BACK.

Subtitle:

The journal remembers you.

Fields:

EMAIL

PASSWORD

Button:

ENTER

Also:

JOIN WITH INVITATION

For new users, invitation links should allow them to join a specific journal.

7. MULTI-USER SYSTEM

The website supports multiple private journals.

A user can:

- create a journal
- invite people
- join another journal
- belong to multiple journals
- switch between journals

Example:

MY JOURNALS

THE BOYS

FAMILY

2026 — BEFORE WE DIE

Each journal has its own:

- members
- dreams
- memories
- completed experiences
- timeline

8. MAIN DASHBOARD

After login, show a beautiful editorial dashboard.

Top navigation:

BEFORE WE DIE

Navigation:

JOURNAL

DREAMS

MAP

TIMELINE

MEMORIES

PEOPLE

VAULT

Profile icon on right.

9. HERO DASHBOARD

At the top:

WE HAVE

143 THINGS

LEFT TO LIVE.

Under it:

27 completed · 116 waiting

Then a tiny quote:

“Life is short. The list doesn't have to be.”

Below this, show a large featured dream.

Example:

SEE THE NORTHERN LIGHTS

ICELAND · 2028

Added by **AFFAN**

A large cinematic image occupies most of the card.

10. STATISTICS

Use minimalist statistics.

Example:

143 things dreamed of

27 things completed

8 countries visited

6 people dreaming together

4 years since the journal began

Don't use colorful charts.

Instead use elegant typography and thin lines.

11. ADD A DREAM

This is one of the most important interactions.

A large button:

+ ADD A DREAM

When clicked, open an elegant full-screen journal-style editor.

Title:

WHAT DO YOU WANT TO DO BEFORE YOU DIE?

Input:

Write it here...

Examples beneath:

"See the northern lights."

"Build a house with my friends."

"Travel across India by train."

"Watch a sunrise somewhere I've never been."

12. DREAM CREATION FORM

Allow the user to add:

TITLE

What do you want to do?

WHY

Why does this matter to you?

CATEGORY

Choose:

- Travel
- Adventure
- Experience
- People
- Love
- Friendship
- Family
- Creativity
- Career
- Money
- Learning
- Self
- Random
- Other

LOCATION

Optional location.

TARGET DATE

Optional.

ESTIMATED COST

Optional.

PEOPLE

Who do you want to do this with?

PRIORITY

★★★★★

PHOTO

Upload inspiration/reference image.

SONG

Optional song associated with the dream.

NOTE

Anything else.

Button:

ADD TO THE JOURNAL

13. DREAM CARD

Every dream should appear as an elegant card.

Example:

#037

SEE THE NORTHERN LIGHTS

I want to stand somewhere completely dark, look up, and see the sky moving.

ICELAND · SOMEDAY

AFFAN · ★★★★★

3 PEOPLE WANT TO JOIN

Cards should have subtle hover effects.

On hover:

- image slowly zooms
 - title shifts slightly
 - metadata becomes brighter
-

14. DREAM DETAIL PAGE

Clicking a dream opens a cinematic full-screen page.

Large background photograph.

Overlay:

SEE THE NORTHERN LIGHTS

ICELAND

Added by Affan

Then:

WHY

"I've spent my entire life looking at pictures of it. I want to see it with my own eyes."

Then:

WHO'S COMING

- ☐ Affan
- ☐ Aryan
- ☐ Sara

Then:

STATUS

- ☐ Someday

Buttons:

I WANT TO DO THIS

MARK AS COMPLETED

EDIT

15. COLLECTIVE DREAMS

A special section:

THINGS WE WANT TO DO TOGETHER

This only contains dreams where multiple members have joined.

Example:

ROAD TRIP ACROSS INDIA

 5 people

CAMP UNDER THE STARS

 4 people

VISIT JAPAN

 6 people

TAKE A RANDOM TRAIN

 3 people

This should feel like a shared adventure list.

16. CATEGORIES

Create beautiful editorial category pages.

PLACES

Travel dreams.

ADVENTURES

Things that scare us.

CREATE

Things we want to make.

PEOPLE

Things we want to experience with others.

LIFE

Experiences that don't fit anywhere else.

CHAOS

Ridiculous ideas.

SOMEDAY

Dreams with no deadline.

DONE

Everything we've actually lived.

17. "CHAOS" CATEGORY

This should be playful.

Title:

BAD IDEAS.

GREAT MEMORIES.

Examples:

- Take the first train available.
- Stay awake until sunrise.
- Eat something we've never heard of.

- Go somewhere without planning anything.
- Wear ridiculous outfits for an entire day.
- Spend 24 hours without phones.
- Say yes to every reasonable suggestion for a day.

Make this section slightly more playful while maintaining the overall aesthetic.

18. MAP

Create an interactive world map.

Every location connected to a dream appears as a small point.

Example:

India Japan Iceland Norway Italy New Zealand

Completed locations should visually differ from future locations.

Clicking a location shows:

ICELAND

3 dreams

1 completed

2 waiting

19. TIMELINE

Create a chronological timeline.

Example:

2026

THE JOURNAL BEGINS

6 people joined.

17 dreams added.

2027

FIRST ADVENTURE

Train journey completed.

2028

ICELAND

Northern Lights dream completed.

The timeline should become more meaningful as years pass.

20. MEMORY SYSTEM

When a dream is completed, do NOT simply mark it with a green check.

Instead:

WE ACTUALLY DID IT.

Allow users to create a memory.

Fields:

DATE

LOCATION

WHO WAS THERE

PHOTOS

VIDEOS

WHAT HAPPENED

FAVORITE MOMENT

SONG

A short journal entry.

Then convert the original dream into a permanent memory.

21. COMPLETION ANIMATION

When someone marks something completed:

Do NOT use confetti.

Instead:

The screen becomes almost black.

The text appears:

WE DID IT.

Then underneath:

Northern Lights · Iceland · 14 March 2028

A subtle camera-flash animation occurs.

Then the uploaded photographs appear.

This should feel emotional rather than gamified.

22. MEMORY PAGE

Every completed experience gets a beautiful archival page.

Example:

ICELAND

14 · 03 · 2028

THE NORTHERN LIGHTS

Large photographs.

Below:

"It looked nothing like the pictures. It was better."

Then:

WHO WAS THERE

Affan · Aryan · Sara

THE SONG

[Song]

THE MEMORY

Journal entry.

At the bottom:

#037 · COMPLETED

23. PEOPLE PAGE

Show everyone in the journal.

Example:

THE PEOPLE

AFFAN

27 dreams · 4 completed

ARYAN

31 dreams · 7 completed

SARA

18 dreams · 3 completed

Click a person to see:

- their dreams
- completed experiences
- favorite categories
- personal quotes
- memories they contributed

Do not make it feel like a social network.

This is a private group archive.

24. PERSONAL PROFILE

Each person gets a minimalist profile.

Large profile photograph/avatar.

Name.

Small quote:

"I want to see how far I can go."

Stats:

27 DREAMS

4 COMPLETED

12 COLLECTIVE

Then:

MY DREAMS

MY MEMORIES

MY FAVORITES

25. FAVORITES

Users can bookmark dreams.

Create:

MAYBE SOMEDAY

A private collection of dreams they love.

26. THE VAULT

This is one of the most important features.

Create a mysterious section called:

THE VAULT

Description:

Things we wrote down before we knew what life would become.

The Vault stores historical snapshots.

Allow the group to create entries such as:

2026

"We were 17."

2030

"We thought we'd be somewhere completely different."

2040

"We somehow made it here."

The Vault should feel like opening an old box of photographs.

27. YEARLY ARCHIVE

At the end of every year, generate a digital yearly archive.

Example:

2026

THE YEAR WE STARTED

17 dreams added.

3 adventures completed.

42 memories created.

6 people.

Then show selected photographs and quotes.

28. YEARLY LETTER

Allow members to write letters to their future selves.

Example:

DEAR FUTURE US,

Where are we now?

Did we actually do the things we wrote down?

Are we still friends?

Did we become who we wanted to become?

Allow these letters to be locked until a chosen date.

29. RANDOM DREAM

Add a button:

GIVE ME SOMETHING TO DO.

It randomly selects an unfinished dream.

Animation:

Cards rapidly cycle.

Then stop.

Example:

TAKE A RANDOM TRAIN.

You have 3 people willing to do it.

30. SEARCH

Search everything:

- dreams
- people
- memories
- locations
- years
- categories

Example:

Search:

Japan

Results:

3 dreams 1 memory 6 people interested

31. FILTERS

Allow filtering by:

- person
- category
- location
- status
- year
- priority
- solo / group
- completed / unfinished

Keep filters minimal and elegant.

32. DREAM STATUS

Use poetic statuses instead of boring task labels.

SOMEDAY

No date.

PLANNING

We're figuring it out.

SOON

It's happening.

IN PROGRESS

We're doing it.

DONE

We lived it.

MAYBE

We're not sure.

33. NOTIFICATIONS

Keep notifications extremely subtle.

Examples:

Aryan joined your dream.

Sara added a memory to “Road Trip.”

Your dream “Japan” has 4 people interested.

No aggressive notification badges.

34. SHARED JOURNAL INVITES

Journal owner can invite people using:

- invitation link
- email
- invitation code

New members choose:

Name

Profile image

Favorite quote

Then enter the journal.

35. PRIVACY

The journal should be private by default.

No public profiles.

No public feed.

No likes.

No follower counts.

No advertisements.

No algorithm.

No public comments.

This is intentionally a small digital room shared by people who matter.

36. COMMENTS / REACTIONS

Instead of likes, allow tiny reactions to dreams:

"I'm in."

"Let's do it."

"Remember this."

"Someday."

Keep interactions human.

37. MUSIC

Allow each dream and memory to have an associated song.

Display:

THE SOUNDTRACK

Song title

Artist

Minimal music-player style component.

Do not autoplay music.

Allow the user to manually play it.

38. PHOTOGRAPHY

Images should look cinematic.

Use:

- large photographs
- portrait photographs
- Polaroid-like images
- slightly imperfect crops
- subtle borders
- occasional handwritten captions

Do not put every image inside a generic rounded rectangle.

Some photographs should bleed to the edges.

39. JOURNAL ENTRY STYLE

For emotional writing sections, use large serif typography.

Example:

“One day we’ll look back at this and realize these were the good years.”

Use generous spacing.

40. MICRO-INTERACTIONS

Use subtle interactions everywhere.

Examples:

Buttons:

- slight brightness increase
- tiny movement

Cards:

- image zoom 1–3%
- subtle elevation
- border becomes slightly visible

Page transitions:

- fade
- crossfade
- slight blur

Images:

- slow parallax

Never use:

- bouncing buttons
- excessive scaling
- flashy gradients
- confetti
- cartoon animations

41. CURSOR

On desktop, create a very subtle custom cursor.

Small circular cursor.

When hovering over:

- images → expand slightly
- clickable text → morph
- buttons → subtle ring

Keep it extremely minimal.

Disable custom cursor on mobile.

42. NAVIGATION

Desktop navigation should be extremely minimal.

Top left:

BEFORE WE DIE

Center:

JOURNAL · DREAMS · MAP · TIMELINE · MEMORIES

Top right:

profile/avatar

On mobile:

Bottom navigation:

HOME

DREAMS

ADD

MEMORIES

YOU

43. MOBILE DESIGN

The mobile experience must be first-class.

Do not simply shrink desktop.

Use:

- full-width photography
- large typography
- swipeable cards
- bottom navigation
- large touch targets

The journal should feel almost like a beautiful native app.

44. RESPONSIVE BREAKPOINTS

Support:

- mobile: 320px+
- tablet: 768px+
- desktop: 1024px+
- large desktop: 1440px+

On very large displays, maintain generous margins.

Never stretch content infinitely.

45. LOADING SCREEN

Create a very short loading experience.

Black screen.

Tiny text:

BEFORE WE DIE

Then:

OPENING JOURNAL...

Then fade into the website.

Do not make loading unnecessarily long.

46. EMPTY STATES

Do NOT say:

"No data found."

Instead:

If there are no dreams:

NOTHING YET.

Someone has to dream first.

+ ADD THE FIRST DREAM

If there are no memories:

WE HAVEN'T LIVED IT YET.

That's okay.

47. ERROR STATES

Maintain the personality.

Example:

SOMETHING WENT WRONG.

Apparently the universe had other plans.

TRY AGAIN

48. FOOTER

Very minimal.

BEFORE WE DIE

A collection of things worth living for.

PRIVATE JOURNAL

PRIVACY

SETTINGS

Then:

Made for the people we don't want to forget.

49. DATABASE / BACKEND

Build the application as a real multi-user system.

Entities:

USERS

- id
- name
- email
- password/auth provider
- avatar
- bio
- quote
- created_at

JOURNALS

- id
- name
- description
- owner_id

- content
- unlock_date
- created_at

LETTERS

- id
 - journal_id
 - creator_id
 - content
 - recipient
 - unlock_date
 - created_at
-

50. SECURITY

Every journal must be isolated.

A user should only be able to access journals they belong to.

Use secure authentication.

Never expose private journal data publicly.

Uploaded media should have appropriate access controls.

51. TECHNICAL EXPECTATIONS

Build this as a production-quality responsive web application.

Use a modern frontend framework such as:

Next.js / React

Use:

- TypeScript
- modern CSS / Tailwind
- accessible components
- smooth animations
- optimized image loading
- lazy loading
- responsive layouts

Backend can use:

Supabase

for:

- authentication
- PostgreSQL database
- storage
- row-level security

Use proper database relationships.

52. ANIMATION LIBRARY

Use Framer Motion / Motion where appropriate.

Animations should be:

- subtle
- slow
- cinematic
- purposeful

Respect `prefers-reduced-motion`.

53. ACCESSIBILITY

Maintain:

- keyboard navigation
- visible focus states
- readable contrast
- alt text
- semantic HTML
- accessible forms
- reduced motion support

Aesthetic should never compromise usability.

54. DESIGN RULE

The single most important rule:

THIS IS NOT A PRODUCTIVITY APP.

It should never feel like:

“Complete your goals.”

Instead it should feel like:

“Remember what you wanted from life.”

The website should create an emotional reaction.

Someone should be able to open it ten years later and immediately think:

“Holy shit. We actually did some of this.”

55. SIGNATURE VISUAL MOMENT

Create a special page called:

ONE DAY

It displays unfinished dreams.

Each dream appears slowly on the screen.

Example:

ONE DAY

See the northern lights.

ONE DAY

Take a train across the country.

ONE DAY

Build something with our own hands.

ONE DAY

Watch the sunrise together.

ONE DAY

Leave everything behind for a week.

Then finally:

UNTIL THEN,

KEEP LIVING.

This should be the emotional centerpiece of the website.

56. FINAL DESIGN PHILOSOPHY

The website should feel like someone discovered an old box containing:

- photographs
- handwritten notes
- train tickets
- maps
- postcards
- unfinished plans
- letters to the future
- memories
- dreams

and somehow turned that box into a beautiful digital experience.

It should feel **human rather than technological**.

Minimal rather than crowded.

Cinematic rather than flashy.

Emotional rather than gamified.

Timeless rather than trendy.

Final phrase:

BEFORE WE DIE

We don't know how much time we have.

So let's make a list.
